Professional Experience

Pinhome / Real estate transaction and financing technology platform Indonesia

Senior Software Engineer July 2021 – Present

- Improved Dart build system to be 14% faster using build.yaml, increasing Developer Experience by reducing preparation time before development or CI/CD pipeline.
- Initiated code conventions by introducing and influencing others to use linter rules on Flutter and Dart. This initiative reduced the need to modify Merge Requests because of minor code style.
- Researched and pitched about modular applications for Flutter. The idea is to separate business flows to its own repository, reducing the scope of regression testing, and let the team focused on each flow have more liberty of their repositories.

kumparan / Digital news media platform. The HR Asia Best Companies to Work for in Asia 2022 Indonesia

Front End Engineer July 2019 – July 2021

- Created User Interface for “Kabar Daerah” (regional news). Combining user location with news’ point to keep users updated to what is happening around them.
- Integrated **Brightcove** video player service to mobile app. The videos enhance the news reading experience or summarize the news for readers.
- Worked with my colleagues to create and maintain an open source project named *react-native-android-inapp-updates*, enable Android users to update the app without the need to open *PlayStore* and keep the news reading flow.
- Worked with my colleague to create kumparan’s iOS widget.

Vospay / Financial credit technology platform Indonesia

Front End Engineer March 2018 – July 2019

- Kickstart and publish the very first mobile application which I design and translate from the desktop web version. The application enables users to manage and monitor their loans easily with a responsive view.
- Worked with my colleagues to kickstart and publish the company’s landing page. Initiated our journey in the world wide web.

Touchten, Quality Assurance 2016-2018
